

ABNORMALITY REPORT

In an ongoing effort to compile information regarding genetic abnormalities in Brown Swiss cattle, the Brown Swiss Cattle Breeders' Association requests that the following form be filled out for each abnormal animal you own, registered or not. **Please contact us while the animal is still alive** in case we need to have blood and tissue samples drawn. Accurate and complete information about abnormalities will benefit all breeders and owners of Brown Swiss cattle. We thank you for your help.

REPORTED BY:

Date: _____

Name _____
